FOREWORD

The Calendaring and Scheduling Consortium (“CalConnect”) is a global non-profit organization with the aim to facilitate interoperability of collaborative technologies and tools through open standards.

CalConnect works closely with international and regional partners, of which the full list is available on our website (<https://www.calconnect.org/about/liasons-and-relationships>).

The procedures used to develop this document and those intended for its further maintenance are described in the CalConnect Directives.

In particular the different approval criteria needed for the different types of CalConnect documents should be noted. This document was drafted in accordance with the editorial rules of the CalConnect Directives.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CalConnect shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be provided in the Introduction.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

This document was prepared by Technical Committee *PUBLISH*.

This document provides guidance on the implementation of the CalConnect patent policy ([CC/DIR 10003](#)) as applicable to internal process and procedures, especially in relation to the standardization and publication processes described in [CC/DIR 10001](#).

INTRODUCTION

General

CalConnect is committed in expanding the realm of standards in collaborative technologies with a focus on interoperability across the globe and communities of practice.

As a proponent of open standards, CalConnect has adopted a patent policy in [CC/DIR 10003](#) to align IPR practice with major international standardization bodies including ISO, IEC and ITU.

Purpose

This document describes guidelines for the implementation of the CalConnect patent policy specified in [CC/DIR 10003](#) in the standardization and publication processes described in [CC/DIR 10001](#).

The intent of this document is to:

- encourage the early disclosure and identification of patents during the standardization and publication processes;
- resolve potential patent concerns and rights problems relevant to the standardization and publication processes.

1. SCOPE

This document provides guidelines on the application of the CalConnect patent policy ([CC/DIR 10003](#)) towards the following areas of CalConnect:

- standardization and publication process (described in [CC/DIR 10001](#));
- document requirements (described in [CC/DIR 10001](#)).

This document does not cover the implementation of requirements in CalConnect standards which involve intellectual property rights (such as patents).

2. NORMATIVE REFERENCES

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

- CC/DIR 10001, *CalConnect Directive: Standardization and publication*
- CC/DIR 10002, *CalConnect Directive: Standard document requirements*
- CC/DIR 10003, *CalConnect Directive: Patent policy*

3. TERMS AND DEFINITIONS

For the purposes of this document, the terms and definitions given in [CC/DIR 10001](#), [CC/DIR 10002](#) and [CC/DIR 10003](#) and the following apply.

3.1. declaration form

“Patent Statement and Licensing Declaration Form” as stated in [Appendix A](#)

3.2. contribution

content submitted to CalConnect for consideration as part of a CalConnect standardization deliverable

3.3. free of charge

patent holder ([Clause 3.6](#)) will not seek any monetary compensation as part of the licensing arrangement (whether such compensation is called a royalty, a one-time licensing fee, etc.); patent holder is still entitled to require that the implementer of the relevant CalConnect standardization deliverable sign a license agreement that contains other reasonable terms and conditions (such as those relating to governing law, field of use, warranties, etc.); does not indicate that the patent holder is waiving all of its rights with respect to a patent, but only on the issue of monetary compensation

3.4. patent

claims contained in and identified by patents, utility models and other similar statutory rights based on inventions (including applications for any of these) solely to the extent that any such claims are essential to the implementation of a CalConnect standardization deliverable

3.5. essential patent

patent ([Clause 3.4](#)) is essential to implement a specific CalConnect standardization deliverable

3.6. patent holder

person or entity that owns, controls and/or has the ability to license *patents* (Clause 3.4)

3.7. reciprocity

patent holder (Clause 3.6) shall only be required to license any prospective licensee if such prospective licensee will commit to license its patent(s) for implementation of the same relevant CalConnect standardization deliverable *free of charge* (Clause 3.3) or under reasonable terms and conditions

3.8. patent declaration

notice or acknowledgement that a patent may cover the use of a CalConnect standardization deliverable

Note 1 to entry: The patent statement and licensing declaration form provided in [Appendix A](#) shall be used for all patent declarations for a CalConnect standardization deliverable (see [Clause 5](#)).

3.9. patent information database

database containing patent information relating to CalConnect standardization deliverables based on information provided to CalConnect in the patent statement and licensing declaration

3.10. technical body

technical committees and any other groups that manage development of CalConnect standardization deliverables

4. PATENT DISCLOSURE

4.1. General

This clause describes the principles of patent disclosure of patents that may affect CalConnect standardization deliverables produced by CalConnect.

This clause applies to any patent disclosed or drawn to the attention of CalConnect during the development of and subsequent to the approval of deliverables.

4.2. Requirements

4.2.1. Participation obligation

All parties participating in the standardization activities of CalConnect are obligated to inform CalConnect of any known patent or to any known pending patent application, either its own or that of other entities, as mandated by [CC/DIR 10003, Clause 1](#), where such parties include recipients of a draft CalConnect standardization deliverable at any stage.

4.2.2. Early disclosure

Patent information should be disclosed as early as possible during the development of the deliverable.

Such patent information should be provided in good faith and on a best effort basis. There is no requirement for patent searches. At times, this might not be possible when the first draft text appears, for example, because the text might be still too vague.

4.2.3. External-originating disclosure

Parties not participating in the standardization activities of CalConnect may also inform CalConnect to any known patent, either their own and/or of any third-party, that may cover a CalConnect deliverable.

4.3. Method of disclosure

4.3.1. Declaration form

When disclosing their own patents, patent holders shall fill in the “Patent Statement and Licensing Declaration Form” (referred to as the “declaration form”) as stated in [Appendix A](#).

4.3.2. Third-party patent disclosure

Any communication drawing the attention to any third-party patent should be addressed to CalConnect in writing.

The Executive Director of CalConnect will then request the potential patent holder to submit a declaration form, if applicable.

4.4. Resolution to unwillingness to license

Whether the identification of the patent took place before or after the approval of a deliverable, if a patent holder is unwilling to license under [CC/DIR 10003, Clause 5.2](#) or [CC/DIR 10003, Clause 5.3](#), CalConnect will promptly advise the project owner(s) responsible for the affected deliverable so that appropriate action can be taken.

Such action shall include, but may not be limited to:

- a review of the CalConnect standardization deliverable or its draft in order to remove the potential conflict; or
- to further examine and clarify the technical considerations causing the conflict.

These guidelines also apply to any Patent disclosed or drawn to the attention of the CalConnect subsequent to the approval of a deliverable.

5. PATENT STATEMENT AND LICENSING DECLARATION FORM

5.1. Purpose

The patent statement and licensing declaration form (see [Appendix A](#)) is provided for entities with information on how essential patents affect CalConnect deliverables (such as, patent holders) to provide consistent, accurate information in the CalConnect patent information database.

5.2. Procedure

Entities shall report patent information to CalConnect using the CalConnect patent declaration form, which is available on the CalConnect website (see [Appendix A](#)).

The completed declaration form should be directly submitted to the designated contact provided on the form.

The declaration form also allows patent holders to make a licensing declaration relative to rights in patents required for implementation of a specific deliverable.

5.3. Declaration of patent license

Specifically, by submitting this declaration form, the submitting party declares, in accordance with the CalConnect patent policy, patents held by it and whose licence would be required to practice or implement part(s) or all of a specific deliverable:

- a. its willingness to license (by selecting option 1 or 2 on the Form); or
- b. its unwillingness to license (by selecting option 3 on the Form).

5.4. Additional information required due to unwillingness to license

If a patent holder has selected the licensing option 3 on the declaration form, then, for the referenced relevant CalConnect deliverable, CalConnect requires the patent holder to provide certain additional information permitting patent identification.

Multiple declaration forms are appropriate if the patent holder wishes to identify several patents and classifies them in different options of the declaration form for the same deliverable or if the patent holder classifies different claims of a complex patent in different options of the declaration form.

Information contained in a declaration form may be corrected in case of obvious errors, such as a typographical mistake in a standard or patent reference number.

5.5. Superseding license declarations

The licensing declaration contained in the declaration form remains in force unless it is superseded by another declaration form containing more favorable licensing terms and conditions from a licensee's perspective reflecting:

- a. a change in commitment from option 3 to either option 1 or option 2;
- b. a change in commitment from option 2 to option 1; or
- c. un-checking one or more sub-options contained within option 1 or 2.

5.5.1. Contact information

In completing the declaration form, attention should be given to supplying contact information that will remain valid over time:

- “Name”, “Department” and “E-mail addresses” should be generic.
- A single point of contact for a particular submitting party is preferred if multiple declaration forms are submitted (particularly for multinational organizations).

For maintaining the currency of information in the CalConnect patent information database, the patent declarer is urged to directly contact CalConnect on any change or corrections to declaration forms submitted, especially on the change of contact points.

5.6. Conduct of meetings

Early disclosure of patents contributes to the efficiency of the process by which deliverables are established.

Therefore, each technical body, in the course of the development of a proposed deliverable, will request the disclosure of any known patents essential to the proposed deliverable.

The leadership of technical body will, ask at an appropriate time in each meeting, whether anyone has knowledge of patents, the use of which may be required to practice or implement the deliverable being considered. The fact that the question was asked shall be recorded in the meeting report, along with any affirmative responses.

As long as CalConnect has received no indication of a patent holder selecting [CC/DIR 10003, Clause 2.3](#), the deliverable may be approved with normal procedure. It is expected that discussions in technical bodies will include consideration of including patented material in a deliverable, however the technical bodies may not take position regarding the essentiality, scope, validity or specific licensing terms of any claimed patents.

5.7. Patent information database

In order to facilitate both the standards-making process and the application of deliverables, CalConnect makes available to the public a patent information database composed of information that was communicated to CalConnect by the means of declaration forms.

The patent information databases may contain information on specific patents, or may contain no such information but rather a statement about compliance with the patent policy for a particular deliverable.

The patent information databases are not certified to be either accurate or complete, but only reflect the information that has been communicated to CalConnect.

As such, the patent information databases may be viewed as simply raising a flag to alert users that they may wish to contact the entities who have communicated declaration forms to CalConnect in order to determine if patent licenses must be obtained for use or implementation of a particular deliverable.

5.8. Assignment or transfer of patent rights

The rules governing the assignment or transfer of patent rights are contained in the patent statement and licensing declaration forms (see [Appendix A](#)).

By complying with these rules, the patent holder has discharged in full all of its obligations and liability with regards to the licensing commitments after the transfer or assignment.

These rules are not intended to place any duty on the patent holder to compel compliance with the licensing commitment by the assignee or transferee after the transfer occurs.

6. REQUIREMENTS ON DELIVERABLES

6.1. Draft deliverables

All drafts submitted for comment shall include on the cover page the following text:

Recipients of this draft are obligated to submit notification of any relevant patent rights of which they are aware and to provide supporting documentation (such as, together with comments).

6.2. Notification

A published document for which no patent rights are identified during the preparation thereof shall contain the following notice in the foreword:

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CalConnect [and ISO] [and IEC] shall not be held responsible for identifying any or all such patent rights.

A published document for which patent rights have been identified during the preparation thereof shall include the following notice in the introduction:

The Calendaring and Scheduling Consortium (CalConnect) [and The International Organization for Standardization (ISO)] [and The International Electrotechnical Commission (IEC)] draws attention to the fact that it is claimed that compliance with this document may involve the use of a patent concerning (... subject matter ...) given in (... subclause ...).

CalConnect [and ISO] [and IEC] take[s] no position concerning the evidence, validity and scope of this patent right.

The holder of this patent right has assured CalConnect [and ISO] [and IEC] that he/she is willing to negotiate licences under reasonable and

non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statement of the holder of this patent right is registered with CalConnect [and ISO] [and IEC]. Information may be obtained from:

name of holder of patent right ...

address ...

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. CalConnect [and ISO] [and IEC] shall not be held responsible for identifying any or all such patent rights.

6.3. Collaborative developed deliverables

Patent declarations in joint deliverables between CalConnect and other organizations apply only to the specific documents indicated in the declaration forms. Declarations do not apply to documents that are altered (such as through adoption).

APPENDIX A (NORMATIVE) PATENT STATEMENT AND LICENSING DECLARATION FOR CALCONNECT DELIVERABLES

This declaration does not represent an actual grant of a license.

Definitions of terms used in this declaration are in accordance with CC/DIR 10005.

Please submit this form to:

Executive Director
The Calendaring and Scheduling Consortium, Inc.

A.1. Terms and definitions

free of charge

patent holder will not seek any monetary compensation as part of the licensing arrangement (whether such compensation is called a royalty, a one-time licensing fee, etc.); patent holder is still entitled to require that the implementer of the relevant CalConnect standardization deliverable sign a license agreement that contains other reasonable terms and conditions (such as those relating to governing law, field of use, warranties, etc.); does not indicate that the patent holder is waiving all of its rights with respect to a patent, but only on the issue of monetary compensation

patent

claims contained in and identified by patents, utility models and other similar statutory rights based on inventions (including applications for any of these) solely to the extent that any such claims are essential to the implementation of a CalConnect standardization deliverable

essential patent

patent is essential to implement a specific CalConnect standardization deliverable

patent holder	person or entity that owns, controls and/or has the ability to license patents
reciprocity	patent holder shall only be required to license any prospective licensee if such prospective licensee will commit to license its patent(s) for implementation of the same relevant CalConnect standardization deliverable free of charge or under reasonable terms and conditions
assignment/transfer of patent rights	licensing declarations made pursuant to CC/DIR 10003, Clause 5.2 or CC/DIR 10003, Clause 5.3 shall be interpreted as encumbrances that bind all successors-in-interest as to the transferred patents. Recognizing that this interpretation may not apply in all jurisdictions, any patent holder who has submitted a licensing declaration according to CC/DIR 10003 – be it selected as a) or b) on the “Patent statement and licensing declaration for CalConnect deliverables” – who transfers ownership of a patent that is subject to such licensing declaration shall include appropriate provisions in the relevant transfer documents to ensure that, as to such transferred patent, the licensing declaration is binding on the transferee and that the transferee will similarly include appropriate provisions in the event of future transfers with the goal of binding all successors-in-interest

A.6. Licensing declaration

The patent holder believes that it holds granted and/or pending applications for patents, the use of which would be required to implement the above document and hereby declares, in accordance with the CalConnect patent policy (see [CC/DIR 10003](#)), that (check one option only):

- a. The patent holder is prepared to grant a free of charge license to an unrestricted number of applicants on a worldwide, non-discriminatory basis and under other reasonable terms and conditions to make, use, and sell implementations of the above document.
 - 1. Also mark here – if the patent holder’s willingness to license is conditioned on reciprocity for the above document.
 - 2. Also mark here – if the patent holder reserves the right to license on reasonable terms and conditions (but not free of charge) to applicants who are only willing to license their patent, whose use would be required to implement the above document, on reasonable terms and conditions (but not free of charge).
- b. The patent holder is prepared to grant a license to an unrestricted number of applicants on a worldwide, non-discriminatory basis and on reasonable terms and conditions to make, use and sell implementations of the above document.
 - 1. Also mark here – if the patent holder’s willingness to license is conditioned on reciprocity for the above document.

- c. The patent holder is unwilling to grant licenses in accordance with provisions of either options a) or b) above.

In this case, the following information must be provided to CalConnect as part of this declaration:

- granted patent number or patent application number (if pending);
- an indication of which portions of the above document are affected;
- a description of the patents covering the above document.

A.7. Patent Information

Preferred but not required for options a) and b). Required for c).
